5. The survey of the town is now complete and it is very desirable that regular maintenance work should be started. Until the survey records are printed, the existing encroachments have either to be removed or licensed. For this the appointment of a permanent surveyor for the Municipality is very necessary and his pay, as laid down by Government, has to be borne by the Municipality and Government in the proportion of 2/3 and 1/3 respectively. The Government may, therefore, be pleased to sanction the post of a Town Surveyor for the Municipality whose work will then be subject to the supervision of the Inspecting Tahsildar. Until this is sanctioned the present arrangement and the existing temporary staff will be continued and they will be deputed to attend to encroachments and survey complaints. I have respectfully to point out that a permanent surveyor with a knowledge of Telugu or Canarese will be more useful for the present work than temporary hands and it is better that removal of encroachments and disposal of survey claims are entrusted to permanent men whom the department will have control subsequently. The further orders of Government are awaited.

A lot of work has to be done in connection with the survey hat is going on and a good number of encroachments have to be - licensed or demolished yet. A full time servant is absolutely - - ecessary to attend to the various demands of the survey party and eputy Tahsildar appointed to watch the interest of Government and unicipality. There is no one else in Municipal service who is ualified to do it or capable of doing it. So I very strongly - ecommend the approval of the A proposal.

The Municipal Commissioner, Bellary requested me in October 1938 to make early arrangements for employing a Town Surveyor to maintain the surveyed and portion of the town and to remove encroachments in the Bellary Municipality. The survey of the town is not complete. I consulted the officer in charge of Survey Party I Salem, who stated that maintenance should be introduced only after the completion of mapping and disposal of land complaints and appeals and after the issue of notification under section 13 of the Madras Survey and Boundaries Act of 1923 which may take about three years.

2 The Municipal Commissioner sent another application in ecember 1938 urging the appointment of a permanent Town urveyor. As the Survey of the municipality is not complete et, and the maintenance records are not ready, I did not agree o the proposal of the Bellary Municipal Council that permanent own Surveyor should oe employed. I informed Commissioner ccordingly and suggested that if the Municipal Council con-idered that the appointment of a Surveyor was so imperative t might employ one at its own cost: and asked the Municipal

Commissioner to send a resolution of the Municipal Council to that effect. The Commissioner has not sent any reply.

3 As the Survey of the Municipality is not complete and the maintenance records have not been printed, I consider that the appointment of a permanent Town Surveyor at the cost of both the Government and the Municipality is premature and unnecessary.

Sub: Survey - Town Survey (Bellary) - Bellary Municipality - Appointment of a permanent town surveyor - Correspondence ending with Board's reference No.F.189/39-2 dated 8th March '39.

* * *

In its reference read above the Board of Revenue has observed that in the circumstances reported by the Collector of Bellary the appointment of a surveyor for the maintenance of the town survey of the Bellary Municipality would be premature.

2. Apparently a good deal, if not the whole of the field work of the survey has been completed and the survey party wants a period of three years for mapping, issuing notices and hearing objections. Under the proposals of the Collector supported by the Board, the Survey will not be maintained or kept up to-date for a period of three years, and by the time the records are ready they will be three years out of date. In the circumstances, it seems desirable to maintain survey up to date either by expediting the completion of the survey formalities or by making arrangements for the maintenance of the record, such as it is, concurrently with such changes as survey may introduce as a result of survey appeals. The Board of Revenue is requested to offer its remarks on the suggestion and submit revised proposals, if necessary.

Expediting the completion of the survey formali is not possible as the nature of the work is such tha delay cannot altogether be avoided. The new survey re will not be available for two or three years. The maintenance of the existing records will not be practicable as the alterations cannot be got incorporated in the records which are being prepared now. Several encroachments are reported to be coming into existence after the survey party had completed the field work and these will have to be controlled in the interest between now an-d the completion of the survey. I therefore consider that a surveyor is necessary to take action in respect of encroachments by eviction or licensing.

A list of final orders passed in the interval may be kept for incorporation in the records later.

The letter from the Collr, Bellary cited above is in reply to the Board's rc dt 12.4.39

2. In his letter at pgh 5 of, the Commr of the Bellary Municipality requested the employment of a permanent Town surveyor for the Municipality. The Collr in ... the Commr's letter was forwarded for remarks regarding as to what as the Survey of the Municipality was not complete & the maintenance records had not yet been started, the appointment of a permanent D.S as the Collr of both the Municipality was premature and unnecessary. The Board agreed with the Collr and reported accordingly to the Govt vide rc. to them B.R.M at pgh. The Govt however suggested further that under the proposals of the Collr supported by the Board, the Survey would not be maintained up to date for a period of three years & by the time the records were ready, they would be three years out of date & therefore suggested that it would be desirable to maintain Survey up to date either by expediting the completion of the Survey formalities or by making arrangements for the maintenance of the record such as it is. ~~The appointment of a T.S for one year in the first instance may also be recommended.~~

16/7/38. The Sub in their memo at p13 of remarked that the proposal of the Govt and the Board not to employ a permanent Dom. Surveyor for the Bellary municipality now, as the survey of the city was not complete and the maintenance records had not been printed, meant that the survey will not be maintained till the records were handed over to the Rev Dept. The survey of the Bellary city is being attended to by no 1. Survey Party. On a reference from the Supdg Surveyor no 1 Party whether the incorporation of maintenance work may not be carried out till the survey records were supplied to the Rev Dept, the Board decided that it was not desirable to postpone the plotting and that there [illegible]

records at once the measurements actually made in the field, and use the survey staff to plot the subdns in red ink in the survey records, the details not noted in the F. N. B as authority for the chs so the fear of the Gat that the Bdy prop. meant that the survey records when he vs will not be reptdate is not well founded. In an emergency the Collr could call the Board may point this out to the Gat.

2 The Collr proposes the employment of a surveyor to take actn in respect of encroachments. As a no of encroachments are springing up after the survey field work. The Collrs proposal, if accepted, ~~may be accepted as recommended to employment of a surveyor for a year in the first instance~~ means that Gat will have to bear a third of the cost. It may be noted that in G.O. No 5047/Ms/d 17.12.38. at p3 c, the Gat sanctioned a spl D/Sr. for 9 months for the removal of encrchts. The Gat are not bound to bear a share of the cost of the spl D/Sr. But the spl D/Sr. will be under the control of the ML Council, and a surveyor if appointed will work under the Rev Deptt. It seems preferable to have a surveyor to do the work. Maps the Bdy may recommend the appointment

It is not known whether the Spl D/Sr is still working and what work he did.

of a temporary surveyor for a period of 1 year, after obtaining the sanction of the Mc Council. Before doing so, the Coll may be asked to report on the following points:-

(1) whether with regard to the advo in Pro. No 1149 d 26-4-32, the Survey staff as is at present the subord. sanctioned by the Dev Dept is the ordinary course of maintenance work, in the Secondary roads.

(2) whether the Spl offr sanctioned in G.O. No No 5047 LA d 17-12-28 is still working and that work be did and whether there are still many encroachments: and

(3) whether the Mc Council is agreeable to the employment of a town surveyor, for the present temporarily for a period of 1 year.

8/7. In Rein memorandum at P. 13 cf. Govt. points out that if no maintenance work is done in the town until the publication of the final Notification by the Survey Dept the records will be about 3 years out of date. It is submitted that arrangements can be made for the maintenance of the records while the Office proceedings are going on in the Dy. Dy.

pp7-8 cf (1)
It will be possible only when a Town Surveyor is appointed to attend to maint. work — as suggested in item (3).

The B. L. A. provides for subdivisions being incorporated in the Survey Records during the interval between the completion of field work and the publication of the 13 Plans
On a Req. recently rec'd. from the O. M. C. & Ry. Dept. the Board has explained the procedure to be adopted in order to carry out changes effected in the course of maintenance work in the Survey Records. This procedure may be observed in the Bellary Municipality, but a Town Surveyor will be necessary to attend to the Maintenance work. A Town Surveyor on Rs. 70 may be appointed, temporary in the first instance, to measure the necessary subdivisions and to inspect the stones, their inspection being first taken up in the blocks already surveyed long ago. If this proposal is agreed, there will not be any necessity for the Dist. Officer sanctioned by Govt. G.O. The Town Surveyor can attend to the measurements of the encroachments and the Municipality can take action

regarding eviction. In this manner the charges can be dealt with and prior effect to fix the Survey records as the same cost as was sanctioned for the Appl. Officer. Fix is for orders whether the Govt. memo. as P. 18 ct. may be replied to on the lines of the note above.
